Arabic Language has become one of the fastest growing languages of the world. Besides it's religious and literary significance, it has enormous potential to survive and outshine other living and developed languages of the world. However in the context of J&K, the language is still in it's infancy and much unawareness and stereotyped notions are prevailing regarding the subject and it's contemporary relevance. There is thus a dire need to familiarize the subject among the targeted learners and acquaint them about the capacity, diversity and learning programmes which the subject offers at various national and international platforms. In this backdrop, the Department of Arabic GDC Women Anantnag is conducting a series of career cum orientation lectures from 9-23 April 2022.
